1. Applicant's amendment filed 11/22/06 has been considered.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis 6,082,616 in view of Berger 2002/0022450. Lewis discloses an ATM machine which includes, as seen in figure 2, a plurality of sheet metal parts (58) and (62). There are disclosed "slots" in the sheet metal part (58) which are receptive of bent or bowed tab parts on sheet metal part (62) for securely fastening (62) to (58). The size of the tabs on (62) inherently substantially correspond to the size of the slots in (58). As seen in the figure, the tips of the tabs are tapered. Lewis, however, does not disclose the tabs are grooved. Berger discloses sheet metal tabs 112 with grooves that fit into

corresponding slots on a second piece of sheet metal (figure 7). It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the grooved sheet metal tabs as taught by Berger in the invention of Lewis in order to more securely attach the two pieces of sheet metal.

5. Claims 1-18,21-23 are allowable over the prior art of record.

6. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention, in conjunction with all the other limitations of the independent claims 1,11,21-23, the at least one groove which has a depth less than the thickness of the at least one tab.

8. Applicant's arguments filed 11/22/06 have been fully considered but they are not persuasive. Claim 19 does not include the element that the at least one groove has a depth less than the thickness of the at least one tab..

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2876

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
